Puget Sound Surveying has worked with many clients and we pride ourselves on our record of customer satisfaction.

Here are a few of our clients comments:

“I couldn’t recommend this company more highly. We own two adjoining lots and we contacted them about adjusting the boundary line and surveying both lots so we could sell the empty lot. They walked us through the process and got it done in a very timely fashion. They even helped us put an easement in for the sewer line. Everyone we worked with was extremely knowledgeable and friendly. Don’t hesitate to call them for a quote, you won’t be disappointed!!” ~Savanna L.

“A terrific service company! From the time that I contacted them on-line for an estimate, through the time that they completed our property survey and walked me through the property lines, Puget Sound Surveying was professional and co’arteous. The scheduling process was straight-forward and flexible. The engineer who performed the on-site work was on time, thorough, and a pleasure to work with. I am delighted! And I found their fees to be competitive.” ~Tari N.
